

Citizens for Protecting Our Northern Waterways

ABOUT US

We are a coalition of local citizen and business volunteers committed to the protection of our pristine waterways in Northern Manitoba

- our focus is on preventing the spread of invasive zebra mussels which can be transported to lakes and other waters by boats and other watercraft that have been in waters infected with zebra mussels
- the spread of zebra mussels, and other aquatic invasive species (AIS), can be prevented

WHAT WE DO

Awareness, Outreach and Advocacy

Our group works to prepare and distribute helpful information on the threat and potential impact of zebra mussels to our waters.

- we hold community meetings, workshops and attend various community events
- we advocate for strong policies and programs that prevent the spread of zebra mussels into northern waters that are free of zebra mussels and other AIS

Government Liaison

We work closely with the Aquatic Invasive Species Unit of the Manitoba Government to assist and augment the work they do to prevent the spread of Zebra Mussels and other AIS.

Resource Material

We assemble and disseminate valuable information to help people and various agencies understand the threat of zebra mussels and other AIS and what can be done to prevent the spread.
